

SQL Assignment

Problem Statement:

You have successfully cleared the second semester. In your third semester you will work with joins and update statements.

Tasks To Be Performed:

1. Create an 'Orders' table which comprises of these columns: 'order_id', 'order_date', 'amount', 'customer_id'
2. Make an inner join on 'Customer' and 'Order' tables on the 'customer_id' column
3. Make left and right joins on 'Customer' and 'Order' tables on the 'customer_id' column
4. Update the 'Orders' table and set the amount to be 100 where 'customer_id' is 3
